**LEGEND**

<b>Hurricane Evacuation Zones</b>	<b>Facility Location Key</b>
Zone A	Medical/Institutional Facilities
Zone B	Mobile Home/Trailer Park
FEMA 100 year flood zone	Fire Station
<b>Evacuation Route</b>	Police Station
Evacuation Route	<b>Hydrographic Features</b>
<b>Transportation</b>	Water
Limited Access Highway	Wetlands
US Highways	<b>Political</b>
State/Local Highways	Town Boundary
Local Road	State Boundary
Railroad	
Airport	

**NOTES & SOURCES**

This map shows shaded Hurricane Evacuation Zones that are recommended to be evacuated from potential worst-case Hurricane Surge Inundation. Areas that may become isolated by worst-case Hurricane Surge Inundation are also included in the Evacuation Zones. Inland areas which may be exposed to fresh water flooding only are not included in the Evacuation Zones.

Evacuation Zone "A", shown in red, is recommended to be evacuated prior to an expected category 1 or 2 hurricane. Evacuation Zone "B", shown in yellow, is recommended to be evacuated prior to an expected category 3 or 4 hurricane. Evacuation Zone "C", shown in orange, is recommended to be evacuated in the unlikely event that the Fox Point Hurricane Barrier were to fail during a worst-case category 3 or 4 hurricane.

Hurricane surge elevations were determined by the National Hurricane Center using the Boston 2 (PV2) SLOSH model basin, and assumed peak hurricane surge arriving at mean high water.

The Evacuation Zones are based on the Hurricane Surge Inundation that can be expected to result from a worst case combination of hurricane landfall location, forward speed, and direction for each hurricane category. For the Hurricane Surge Inundation Areas, see the map series entitled "Rhode Island Hurricane Evacuation Study, Hurricane Surge Inundation Mapping", May 2009.

The source of basemap transportation features such as roads and railroads is Tele Atlas 2008. The source of other basemap features is the Rhode Island Geographic Information System (RIGIS).

The horizontal projection of this map is Rhode Island State Plane NAD83 feet.
