### Do Not Write Below this Line – Office Use Only

A) Check Meter Size to determine appropriate fee. Applicant to provide approved Water Service Application.

Meter Size	Connection Fee
<input type="checkbox"/> 5/8"	\$1,500
<input type="checkbox"/> 3/4"	\$3,800
<input type="checkbox"/> 1"	\$4,800
<input type="checkbox"/> 1 1/2"	\$7,600
<input type="checkbox"/> 2"	\$10,133

B) If meter size is greater than 1", the applicant shall provide an analysis of proposed water use prepared and stamped by a registered Rhode Island Professional Engineer. The connection fee shall be determined at the rate of \$1,500 for each 500 gallons per day, or portion thereof, of proposed use but not less than \$4800.

C) For multi-family housing, or multi-family combined with commercial use, whether apartments or condominiums, or hotel type use, the fee shall be either the fee determined by the schedule above or the product of the number of housing units times \$1,500 per unit, whichever shall be larger.

Number of units \_\_\_\_\_ x \$1,500 = \_\_\_\_\_

Fee Due: \_\_\_\_\_

Treasury Division: Payment Received: \_\_\_\_\_ Date: \_\_\_\_\_ Received by: \_\_\_\_\_

Approved By:

Erik Skadberg, City Engineer

Stephen Coutu, Director of Public Works

Date

**Application Procedure:**

Pursuant to Section 17-103 of the City of East Providence Ordinances:

(a) Application for a building sewer permit shall be made by a licensed plumber or drainlayer, his agent or representative. Application shall be made on an application form provided by the director of public works. Each application shall be supplemented with the plans and specifications for the sewer connection and such other information relating to the building and the wastes to be discharged, as may be considered pertinent by the director. A permit and inspection fee shall be paid to the city at the time the application is filed.

(b) The schedule of sewer connection fees based upon water meter size shall be established as follows:

Meter size	Connection fee
5/8"	\$ 1,500.00
3/4"	3,800.00
1"	4,800.00
1 1/2"	7,600.00
2"	10,133.00

(c) For meter size larger than 1", the connection fee shall be based upon the proposed water use established by a study performed and sealed by a Rhode Island registered professional engineer and approved by the Director of Public Works. Such fee shall be at the rate of \$1,500 for each 500 gallons per day, or portion thereof, of proposed use but not less than \$4,800.

(d) For multi-family housing, or multi-family combined with commercial use, whether apartments or condominiums, or hotel type use, the fee shall be either the fee determined by the schedule above or the product of the number of housing units times \$1,500 per unit, whichever shall be larger.

(e) This application and fee structure shall apply to sewer connections within the City of East Providence Wastewater Treatment Facility sewer district. Connections within the Narragansett Bay Commission (NBC) sewer district shall be subject to NBC connection fees.

(f) Application shall be supplemented with a plan showing the location of the sewer connection, the building, street lines, and proximity to other utilities (water, gas, etc.). If excavation into the street is necessary then the applicant shall also secure an Excavation Permit from the City.

(g) All costs and expenses incident to the installation and connection shall be borne by the applicant/owner. The issuance of this permit shall be contingent upon the plumber or drainlayer indemnifying the City against any loss or damage that may be caused, directly or indirectly, by the installation of the building sewer and its proper function.

(h) All work shall be performed in accordance with all applicable City codes and standards.

(i) The applicant shall notify the City's Engineering Division (435-7703), when the sewer connection is ready for inspection. The City shall be notified not less the 48 hours in advance of the time of the installation. No sewer connection shall be covered until it has been inspected and found to conform to the established requirements and standards.
